ORGANISATIONAL CHART AND PROCESSES

Nature and Extent of involvement of Faculty and students in academic affairs/improvements

With the expansion of the college, the concerns with quality and the growing 'consumerism' education there has been a significant growth of, and sophistication in, process designed to collect views from students.

We collect some type of feedback from students about their experience of education. 'Feedback' in this sense refers to the expressed opinions of students about the service they receive as students. This may include perceptions about the learning and teaching, the learning support facilities (such as, libraries, computing facilities), the learning environment, (lecture rooms, laboratories, social space and university buildings), support facilities (refectories, student accommodation, health facilities, student services) and external aspects of being a student (such as finance, transport infrastructure).

Student views are usually collected in form of 'Student' feedback. Sometimes there are specific attempts to obtain student views on how to improve specific aspects of provision or on their views about potential or intended future developments but this is less usual.

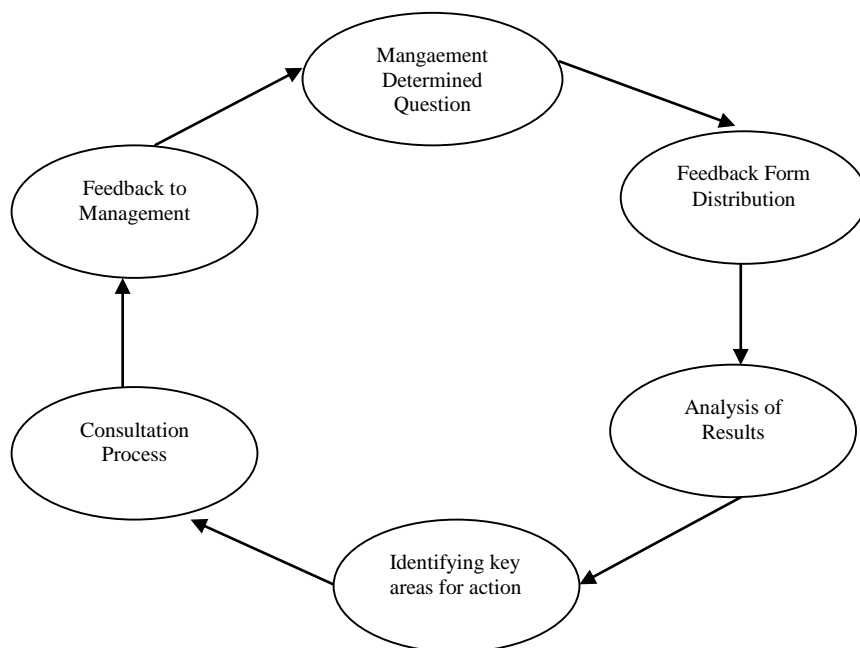

It is not always clear how views collected from students fit into institutional quality improvement policies and processes. To be effective in quality improvement, data collected from surveys and peer reviews are transformed into information that is used within our institution to have effect change.

Mechanism / Norms and Procedure for democratic / good Governance

- Department-wise meetings are conducted every month under the supervision of HOD of the concerned department and Principal
- Class Advisors meetings are conducted every month
- Quality circle has been implemented with faculty members
- Class Advisor and Students meetings are also conducted every month

Student Feedback on Institutional Governance / Faculty Performance

To make an effective contribution to internal improvement processes, the views of students are integrated into a regular and continuous cycle of analysis, reporting, action and feedback (figure 1)

Grievance redressal mechanism for faculty, staff and students

A committee is responsible for handling, management and redressal of all the genuine grievances of both faculties and students. The aggrieved student or faculty shall represent his/ her grievances in person. The faculties and students have the complete rights to register their complaints/grievances. The students and faculties grievances are collected from the sources of feedback. The suggestion boxes are kept in the appropriate places to post the complaints/grievances which can be utilized by them.

A structured system is laid down to meet the college's redressal mechanism to be more meaningful and effective. The system ensures that the redressal sought is handled in just and fair manner and is enabled through a set of framework of rules and regulations.

Establishment of Online Grievance Mechanism

Students are allowed to submit their grievance through online Grievance Redressal Mechanism now which is available in our holycrossengineeringcollege.com website. This mechanism is open to our Students who can easily submit their grievance by their valid register number and can easily keep tracking their submission for the step-by-step process. Also the management keep tracking the online grievance and updating the steps taken for rectifying the grievance. This mechanism helps both the management and students to rectify the grievance without delay. Monthly report of this online grievance mechanism is taken and is sent to AICTE.
